EARLY BERRY
GROWN

BIG JOE—A wonderful money-maker.

INSTRUCTIONS TO PURCHASERS

HOW TO ORDER.—Send me your order as soon as convenient, then I will reserve the stock for you and ship when wanted. Be sure to write your name and address plainly, and state how goods are to be shipped; whether by Parcel Post, Express or Freight, and state plainly to what point you want them sent.

TRANSPORTATION RULES.—The ownership of all goods sold by me passes to the purchaser on delivery by me to the carrier, and the issuing of a receipt by the carrier ends my responsibility. Any claims for damage should be made promptly to the agent at the point of delivery. Under no conditions may we be held responsible for safe delivery.

SHIPPING SEASON.—We begin filling orders about October 15th, sometimes a little earlier, and continue digging and shipping during the entire fall, winter and spring until May 1st. We are sometimes delayed in January and February and early part of March by freezing weather, but usually able to ship at times during these months.

SPECIAL PRICES.—We quote very attractive prices on large orders. Send us your want list for quotations.

CLAIMS, if any, must be made on receipt of goods, and if just, will be made satisfactory. We send out only good stock in good condition, carefully packed in all cases, but success or failure depends in so large a degree upon the care and management after received that we do not, because we cannot, undertake to guarantee stock to live.

SUBSTITUTION.—Late in the season we usually run short of some varieties listed herein; therefore, when you order late, please state on order sheet if you do not want us to substitute should we be sold out of the variety you order. If we substitute will give you a variety as near like the variety you ordered as possible.

HEALTHY STOCK.—Every year before any are shipped our stock is inspected by the State Entomologist and State Pathologist. Every package we ship has one of the Certificates of Nursery Inspection attached to it.

TRUE TO NAME.—We use every care to have plants true to name, and we will not be responsible for any sum greater than the original cost of stock should any prove not true to name.

Telegraph or Telephone us at Pittsville, Md.

GLADIOLI

This class of summer flowering bulbs is doubly valuable for the brave field show of bloom, and for its generous supply of cut flowers. Gladiolus flowers last longer when cut than most any other flowers, and develop in water to a greater perfection than if left on the plant. Any rich, light garden soil will grow Gladioli if properly worked in preparation and exposed to the benefit of full sunlight. Bulbs should be planted from the middle of April on into May throughout the Northern States, a second planting after two or three weeks ensuing a more even succession of bloom.

AMERICA. A beautiful soft shell-pink color, tinged lavender; growth and habit perfect. Too well known to need comment. Fine for cut flowers. 5 cents each; 50 cents per dozen.

HALLEY. Enormous open flowers of a delicate flesh color, shading lighter to the centre, with a cream yellow and carmine blotch. Very early. 6 cents each; 60 cents per dozen.

MRS. FRANCIS KING. Large flowers of a light scarlet color, or betted described as flame color, are about 4½ inches across. Spikes always have five to six flowers open at one time. For garden effect or cut flowers it is one of the best. 5 cents each; 50 cents per dozen.

PRIMULUS HYBRIDS. A new race of dainty and beautiful gladioli. Every shade in the rainbow with orange and gold predominating. The flowers are hooded and the stems gracefully curved. Very early. 75 cents per dozen; \$5.50 per hundred, postpaid.

MRS. WATT. A clear wine-red of the most pleasing color. Large flowers of good substance, well opened on tall, strong well-filled spikes. 7 cents each; 60 cents per dozen.

PEACE. Grand white flowers, very large, with pale lilac feathering and claret blotch on lower petals. Tall graceful spikes with flowers nicely placed. 7 cents each; 60 cents per dozen.

SCHWABEN. One of the very finest pale yellow varieties; a clear canary yellow shading to a soft sulphur yellow when opening. Very attractive. 10 cents each; 75 cents per dozen.

PIONEER GLADIOLUS MIXTURE. We strive each year to improve the quality of this very popular Mixture. A wonderful assortment, containing a large percentage of the best varieties and latest novelties. We recommend this as one of the best bulb investments you can make. 60 cents per dozen; 50 for \$2.25; 100 for \$4.00, postpaid.

CHESAPEAKE—Large, good flavor, good cropper, good shipper, good seller

BEDERWOOD. A good berry for home use and near-by market, and one of the most productive on my list.

BIG JOE. This is one of the best berries on the list. Above medium in size, almost perfect in shape, very solid, bright red in color, and a good heavy bearer for so large a berry. The fruit is borne on long stiff stems, well up from the ground. Plants are very large and deep-rooted. Strong grower. A bed of Big Joe in fruit is about as handsome a sight as one often sees and it is a money-maker for both near-by and distant markets. Don't fail to plant Big Joe.

BUBACH. Large size and handsome color are its most valuable characteristics. Color is a beautiful bright red, neither dark nor light. Foliage dark and waxy. Berries thick, meaty, fine grained, often weighing more than an ounce each.

CAMPBELL'S EARLY. This is a new extra-early variety of great promise. In New Jersey, where it originated, the growers are very enthusiastic over it. One leading grower says: "Campbell's Early comes in ahead of them all, growing from such large, healthy plants with a light green, waxy, upright foliage protecting the great crop of large, beautiful, rich red berries. They have a beautiful green calyx and come second to none in flavor." One of the most wonderful features of the Campbell's Early is that practically all grow to full size and no knotty, ill-shaped berries; they ripen perfectly all over with no green ends. They are fine, vigorous growers, have perfect blossoms and will retain their firmness in carrying to distant markets.

CORSICAN. A favorite home and near-by market variety in many sections. It is one of the very largest, holding its size well through the season, beautiful dark crimson color, rich and delicious. Plant a strong grower with good healthy foliage, producing large crops.

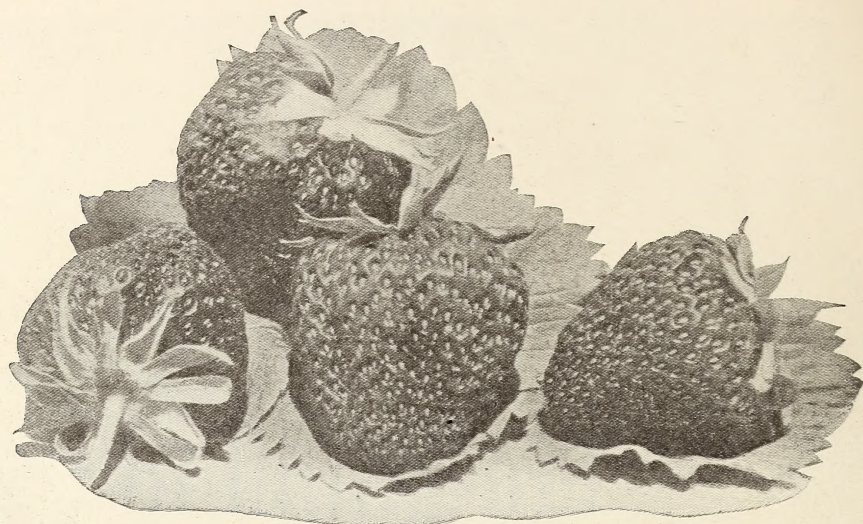

BRANDYWINE. Produces an abundance of large, handsome berries; good color and shape; peculiar and very fine flavor.

CHESAPEAKE. The standard of excellence by which most other fancy berries are compared. With fair growing conditions, just about enough plants are produced for a good fruiting bed; is very strong and healthy. The plants are very strong and robust and have very long roots, which make it one of the best drought resisters. Berries are uniformly large, with prominent yellow seeds and an attractive bright green cap, altogether, making Chesapeake one of the most beautiful and attractive berries in the package that I have ever seen. The berries are unexcelled in quality. The plants set a good crop and every blossom matures a berry, the last ones being just as large as the first. The flesh is very firm in texture and the berries will keep for many days in excellent condition, so that altogether it is an ideal berry for home use, for local market or for distant shipment. One of the most valuable features of the Chesapeake, especially in the North, is that the blossoms don't start out until quite late, which makes it practically frost-proof.

DR. BURRILL. A variety that is growing very popular, resembling Senator Dunlap in appearance. The berries are large and beautifully formed. The surface of the berry is a deep glossy red, the meat is solid and rich. As a canner it surpasses Warfield. The berries are excellent shippers and good keepers. An ideal berry for either home use or for the market.

FENDALL. One of the very good late imperfect varieties that should be planted with Ford, Big Joe, Chesapeake, etc.; is exceedingly productive and extra large size bright scarlet red berries. It is said to have grown more than 20,000 quarts per acre in this State near Baltimore City, where it was originated. Fendall always pleases.

Premier is the most profitable early strawberry grown

FORD—A heavy producer of fine fruit.

FORD. A perfect flowering variety ripening about the same time as Chesapeake. Very productive and a good plant maker. Berries large and attractive. A very popular berry where it has been fruited.

GANDY. One of the universal favorites, and as a "money-maker" hard to beat. A good grower with tall, healthy foliage, and produces large, dark crimson berries that, when fully ripe, are of excellent quality. It is a splendid berry and always brings fancy prices. A free plant maker and a good grower, while its extra firmness makes it keep on the vines longer than almost any I know. Late. If you grow late strawberries you need Gandy.

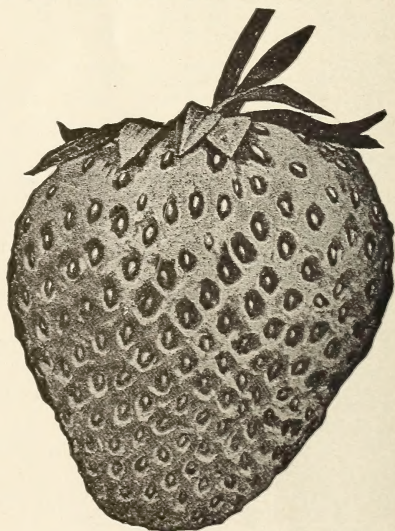

GIBSON. Berries are large and regular in shape, holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive; in fact, we know of no variety that will produce more quarts of berries per acre than the Gibson. It makes a strong, vigorous plant that withstands adverse conditions admirably. We recommend it and know you will not make any mistake in planting Gibson.

GLEN MARY. Probably no variety of strawberries will produce more quarts per acre than Glen Mary. It is very popular throughout the northern half of the United States, and especially in Pennsylvania, New York and New England. Firm enough for distant shipping. It is of handsome appearance and good quality. The fruit is of large size and dark red in color with prominent seeds of bright yellow. The meat is so rich and juicy and of such high flavor that, when once eaten, more is wanted.

HAVERLAND. Exceedingly productive. Fruit large and fine. One of the most popular of the well-tested varieties. It will stand more frost than most any other variety, often bearing large crops when others are killed. We can always depend on a large crop. Few varieties will produce more fruit per acre or sell for more money. The demand for plants is always great.

KLONDYKE. One of the most heavily planted early berries in the country today; found in nearly all the large growers' fields. I believe this is sufficient recommendation for any berry.

HOWARD No. 17. A new variety resembling Premier very much from Connecticut. Described by a reliable Connecticut grower as follows: "The earliest fancy variety that I have ever seen. The first fruit to ripen is fully as large as Chesapeake, fully as firm and the quality fully as good. It is of the same cone shape and the color much the same, possibly not quite so dark, but glossy and handsome. Will yield three times as much fruit as Chesapeake and is on the job a week before Chesapeake begins to ripen. So great is my faith in this variety that more than one-half of all I set the coming spring will be Howard No. 17. This variety has come in competition with hundreds of competitors on the grounds of the Connecticut Agricultural College and vanquished them all, not only for one or two years, mind you, but for ten years."

GIBSON—A wonderful heavy cropper

BIG LATE—For a very late berry try this one

PREMIER. This is undoubtedly the best early berry of them all and the Premier is a money-maker for the market grower. Growers who have tried all the leading sorts for the past twenty or more years claim they have never fruited a berry that will come anywhere near making the money that Premier does. It does not seem to have any weak points. The plants are strong, vigorous growers, very productive of beautiful glossy, rich red berries with a bright green cap, which adds much to their beauty. The berries are delicious in quality, and it is one of the best shipping berries. Whether you want a berry for your home table, local market or for long distance shipping you cannot afford to overlook Premier. It begins ripening with the early sorts and lasts until most of the mid-season sorts are through. There is an awful demand among the growers in the big shipping sections for Premier, as it was by far the best money-maker of them all last season. Reports come in from all sections of the country saying it can't be beat.

KELLOGG'S PRIZE. A variety with a very long fruiting season. It thrives in soils of every class, and yields immense quantities of large, perfectly-formed berries, highly colored from centre to circumference, its golden seeds lending a gloss to the surface of surpassing brilliancy and beauty. There is no other berry having a flavor of greater delicacy. Foliage large and healthy, calyx large and green. One of the heaviest fruited I have ever grown, and I recommend them to you for trial.

KELLOGG'S BIG LATE. A late berry that is rapidly forcing its way to the front. A heavy cropper and a good shipper.

LUPTON. One of the largest and most handsome berries that I have ever seen. On the large markets it always brings the top-notch price on account of its large size, handsome appearance and well-keeping qualities. The plant is a vigorous grower and produces strong, healthy plants with clean foliage. Very productive, and the berries are uniformly large, bright red in color, with a large green cap, which adds much to their appearance. It is a money-maker for the above reasons, but do not set it for your home table alone, as it is of very poor eating quality, but for distant markets it is hard to beat as a mid-season to late variety.

KELLOGG'S PRIZE—The late berry without a fault

MAGIC GEM—The gem of perfection

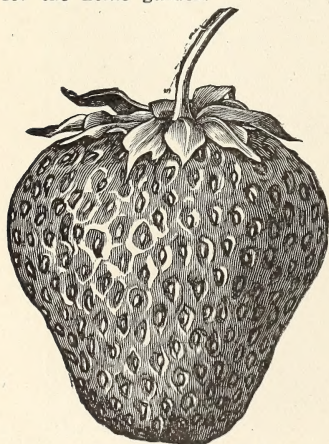

MAGIC GEM. A mid-season to late variety originated by Edward Vance, of Idaho. Because of the unusually large size and high quality of the berries and its long fruiting season, Mr. Vance has controlled the strawberry trade in his local market. The berries are not only large and abundant, but they also are beautifully formed and are distinctly cone-shaped. The berries are highly colored, being dark red with a glossy surface, and bright yellow seeds which are embedded in the surface just deep enough to produce a beautiful contrast. The flavor of the fruit is mild and delicious. The calyx is a dark, rich green, which adds to the beauty of the berry. The berries are very firm and ship exceedingly well.

McKINLEY. Unrivalled as a strawberry of endure shipment. It is pre-eminently a variety for the home garden.

MARSHALL. Too well known to need any extended description. This is a berry that has been so popular in the New England market for years, where the grocers are always delighted to get it on account of its rich dark red color, that it is bound to attract and please customers. It is one of the richest flavored strawberries grown. It is a strictly fancy berry. Mid-season.

MISSIONARY. A variety that is proving very popular all through the South. It is a strong grower, making plants freely; early to mature, coming in right after Excelsior, and very productive. The berries are well colored, firm, large and hold their size well throughout the season. It is a good shipper, having a tough skin not easily broken by handling.

MITCHELL'S EARLY. An old favorite and still a favorite with many.

SENATOR DUNLAP

LUPTON—Brings top prices on all markets

DR. BURRILL—The million dollar strawberry

ST. MARTIN

NEW YORK. This is the strawberry that was awarded a prize of \$100, which was awarded for the best and largest variety. The plant is an unusually robust grower, making but few runners, throwing its strength and vigor into the magnificent berries, which are produced in great abundance and are of immense size. In form they are very handsome and regular, of a medium conical shape. Color a crimson-scarlet, dark, rich and inviting, coloring all over and leaving no green tips. The flavor is deliciously rich and melting. For a fancy strawberry it is one of the best, but its large size and delicate texture would possibly prevent the berries from arriving in good condition in distant markets. This berry is so popular it has been introduced under many different names.

PARSON'S BEAUTY. One that may be depended upon to produce a large crop of fruit every season. The plants are splendid growers on any soil and without a sign of disease. The fruit is large, conical, uniform shape, dark red and fair quality. Largely planted by commercial growers on account of its vigor and productiveness.

SHARPLESS. An old and well-known berry, especially desirable in home gardens. Fruit large and of excellent quality.

SAINT MARTIN. This variety originated with Louis Graton, of Tompkins County, N. Y., several years ago. It has been thoroughly tested out and proven its great worth. For several years it has captured the first prizes at the annual strawberry shows of the Massachusetts Horticultural Society in Boston. The plants are large stocky growers, of the Marshall type, very sturdy and productive. The berries are very large, firm and hold their size better than most other varieties until the end of the season. The berries are rich clear through. This variety is destined to be the most popular variety for fancy trade and with those who appreciate quality and know what really fine strawberries are.

SENATOR DUNLAP. The Dunlap is a variety that beginners who know practically nothing about strawberries can succeed with. The foliage is tall, upright with a long leaf, and has more than the ordinary power of developing a heavy crown system. It has an extra long flowering season; the bloom is handsome and exceedingly rich in pollen, which makes it very valuable to plant with such pistillate kinds as ripen in its season. Its long roots go down into the sub-soil for moisture, and a severe drought has less effect on it than most others. The fruit is a dark red, with a glossy finish, shading to a dark scarlet on the under side, with prominent yellow seeds that look like gold embedded in highly colored wax. The meat is bright red all through and exceedingly juicy. For a medium size, very productive, mid-season berry, don't hesitate to plant Dunlap.

RYCKMAN. Said by some to be the best mid-season to late table and near-by market berries.

SUCCESS. One of the finest early berries for the home garden; large, sweet and delicious.

THE "BEST." A large grower in New York State has the following to say about the "Best." "This variety is by far the best strawberry that has ever fruited on our grounds. This is saying a good deal, for we have been growing strawberries for nearly thirty-nine years. It is no experiment with us, as we have tried it under all conditions, on all kinds of soils and under different treatment for at least ten years. The plants are model growers, very vigorous and stalky. None more productive. The berries ripen very late, almost the latest of all, coming just at the time when the last strawberries bring the best prices. The berries are very large, glossy and attractive, have fine flavor and when once sold to a customer they bring a demand for more of the berries. The fruit is very solid, firm and a good shipper." He goes on to praise it much more, but I believe the above is sufficient recommendation for us to at least give it a trial.

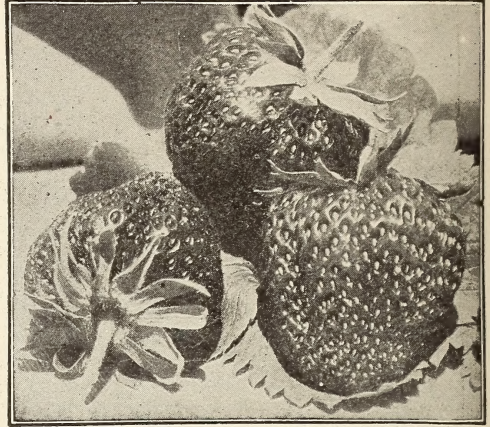

For home use or for market Premier is the best early

TENNESSEE PROLIFIC. Berries medium size and light in color. Flesh fine grained and of good quality. Fairly good shipper. Very productive. Good pollinizer.

WARFIELD. Very popular for canning on account of its rich flesh and high color. It is a vigorous grower and persistent plant maker. If not allowed to get too thick it will produce a great crop of medium-sized, highly-flavored and highly-colored berries. Blossoms imperfect.

WILLIAM BELT. A king among strawberries. The plant is vigorous and succeeds upon a great variety of soils, and invariably yields very heavily. It begins to ripen quite early and continues almost to the close of the season. It is firm and a good shipper and gives large pickings for a longer period than most varieties.

MIXED PLANTS. In digging plants we sometimes get up too many of certain varieties and have them left over. Occasionally a plot in the field becomes mixed. My mixed plants are made up either from plants left over or from a mixed plot. They will be good plants and when possible we will tell you the name of the varieties.

PROGRESSIVE—The most popular fall bearer

EVERBEARING STRAWBERRIES

Bears from June till Thanksgiving.

These everbearing strawberries are pre-eminently the home-garden berry, although the fruit may be shipped short distances if properly packed. The method of raising these berries is the same as for the other sorts, excepting that for the first season (that is, the same season they are planted), all blossoms that come before the middle of July should be kept cut off. They not only produce a good crop of berries the first year planted, but the following year they fruit at the same time as the old standard sorts and then produce another crop in the fall.

PROGRESSIVE. This is generally considered the best of them all. Produces immense crops of medium size berries of the very highest flavor, even better than most of the "June only" varieties. If you have never grown strawberries of any sort you will be safe in planting these.

SUPERB. In some sections, especially the North, this is considered better than Progressive, but for the South and Middle States I believe Progressive the best. The berries of Superb are larger than the Progressive, but it does not produce half as many of them, nor is it usually as good a plant maker. The berries resemble those of the Chesapeake.

PEERLESS. Better than Superb, being a more vigorous grower, more productive of equally as large fruit and fully equal to Superb in quality. If you have been growing Superb try a few Peerless.

TOP NOTCH. A strong, luxuriant grower, not affected by any disease. One of the most productive of the everbearers, as large as the Superb and much more productive with me. If you want something extra fancy try Top Notch.

AMERICUS. The berries are medium to large in size, firm and of the very highest flavor, very spicy; the flavor is entirely different from any other strawberry that I have ever tasted.

IDEAL. One of the newest of the everbearers. Has a little smaller plant than the Superb and the berry is a little smaller, but it is much more productive.

MINNESOTA No. 1017. The plants are good sturdy growers, produce a goodly number of runners, besides stooling heavily. The fruit that each individual plant produces is almost incredible. They simply lay about the plants in piles. The fruit is good size, round in shape, deep red in color and very firm and of good quality.

PERFECTION. This is a new variety of everbearers that we firmly believe will soon be at the top of the list when it comes to everbearers. Perfection is a good plant maker and produces a wonderfully large crop of large size and most delicious fruit. Our supply of this variety is not large and must limit each customer to not more than one hundred plants.

PERFECTION—Rightly named

PRICE LIST OF STRAWBERRY PLANTS

Instructions for Determining the Cost of Plants

Beneath the varieties in each column below is a complete scale of prices which applies separately to each individual variety listed in that column. If plants are wanted of more than one variety, figure that variety separate same as though you were ordering only one variety. If strawberry plants are wanted in larger quantities than we have them priced write us. We can make better prices on larger lots.

PARCEL POST CHARGES

If you want stock shipped by Parcel Post would advise you to have it sent C. O. D. for amount of postage. By doing this you pay your postmaster or carrier the actual amount of postage when you receive the goods. This is much more satisfactory to both of us.

If You Want the True PREMIER, Send Us Your Order

If you want the true PREMIER, the sensation in strawberries for all purposes, the strawberry that is a good plant maker, a great cropper, of finest flavor and color, the very choicest berry for table and preserving, a frost and drought resister, be sure and send your order as soon as you can. We have a fancy lot of them.

THE LOGANBERRY

25 cents each; \$5.00 for 25; \$15.00 per 100

A hybrid between the Raspberry and the Blackberry. The fruit is as large as the largest blackberry and is produced in immense clusters. The color is clear, dark red. It partakes of the flavor of both blackberry and raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm and carry well. Strong grower; enormous bearer. Fruit ripens early, just after strawberries.

The matter of buying your plants may look like a small matter, but it is an important job because so much depends on the right kind of plants. No matter how valuable your land—no matter how much you weed, dig, hoe or cultivate—no matter how deep you plow—how well you make the seed bed, how much you disc and harrow or rake your garden—no matter how much the sun shines, or how much rain you get—or how much you irrigate or water your garden—no matter how ideal the weather conditions may be or how much you fertilize or manure the soil—and every one of these things represents real money—they are all lost—all wasted—all the effort counts for nothing if in the first place you don't have the right kind of plants to put in the soil.

LOGANBERRY—You should try it

Plant the Everbearers and have strawberries this summer and fall

RASPBERRIES

Coming immediately after strawberries, when there is a dearth of other fresh fruit, raspberries are much sought after for planting in the garden and also in the field for market. They are easily cultivated and beds seldom require renewing. Their season of ripening is long and fruit always in demand. Plant in good soil and manure freely from time to time. Plant four feet apart each way. Cut out the old shoots each spring.

10 cents each; \$1.25 for 25; \$3.50 per 100; \$25 per 1000.

ERSKINE PARK

ERSKINE PARK (Everbearing). Of this grand berry I cannot say too much in praise, and I predict that, once known, it will be a standard for planting in every garden and considered a necessity. The St. Regis has been the standard everbearing variety up to the present time. In the Erskine Park we have a berry that far surpasses it; a raspberry that is a delight to eat, each berry being of the largest size, with its delicious melting flesh, full of rich, creamy juice, highly flavored and sweet as honey. Conceive the joy and satisfaction of having such berries on your table all through the autumn, the source of wonder to your neighbors, that you can pick the finest raspberries till the snow flies. Owing to my being able to secure a large stock of plants of this variety I am offering them at the price of the other common varieties.

ST. REGIS (Everbearing). Ripens with the earliest and continues on young canes until autumn. Color red, flesh firm and meaty. Largely planted.

CUMBERLAND. A healthy, vigorous grower, throwing up stout, stocky well-branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about the same as Gregg, keeps and ships as well as any of the blacks.

PLUM FARMER. A vigorous, stocky growing black cap, very healthy and attractive in appearance; productive, bearing heavy crops of large, fine jet black berries; excellent quality and a good shipper. One of the most valuable market berries, as it commands top prices.

DEWBERRIES

75 cents for 25; \$2.00 for 100; \$15 per 1000

LUCRETIA. Extremely productive of berries as large as the largest blackberries; ripens two weeks before blackberries. Dewberries are same as blackberries, except vines of dewberries run on the ground while blackberry canes grow up.

BLACK BERRIES

Blackberries are among the best known and most valued of our berries. No fruit of any kind is more wholesome. A liberal use of berries and other good fruit will save doctors' bills. Blackberries should be planted in rows six or seven feet apart, three or four feet in the row. Keep the ground light, rich and clean, and pinch the canes back when they have reached four feet in height. The demand for blackberries is always good.

10 cents each; \$1.25 for 25; \$3.50 per 100; \$25 per 1000.

EARLY HARVEST. One of the earliest, berry medium sized, good quality and very prolific; firm and attractive in appearance. A good market sort.

ELDORADO. Vine is vigorous and hardy; berries are very large, black, borne in clusters; ripens well together; sweet, melting and pleasing to the taste.

BLOWERS. In this we have a large productive and hardy blackberry. Blowers is a sturdy grower (the canes, if unchecked, attain a height of 10 to 12 feet on fertile soil). It yields very heavily and for a long season. The fruit is handsome as well as large, and is of superb quality. Its canes have endured a temperature of 20 degrees below zero unharmed, and it has yielded at the rate of 280 bushels per acre.

CURRANTS

20 cents each; \$1.50 for 10; \$12.50 per 100

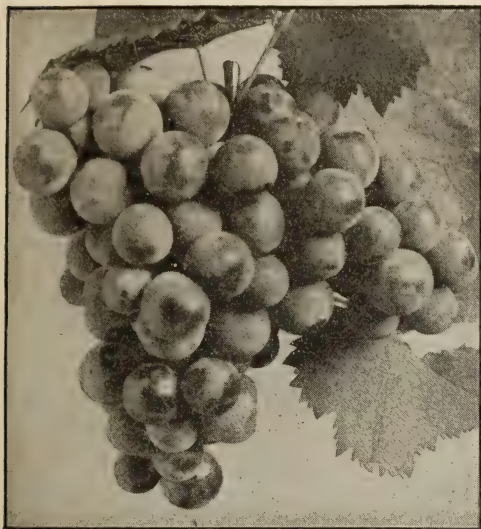

FAY'S PROLIFIC (Red). A cross between Cherry and Victoria. Of large size, fine flavor and claimed to be twice as prolific as the Cherry. Highly recommended by those who have seen or had experience with it.

WILDER. A remarkable new variety both for table and market; strong grower, enormously productive; bunch and berry very large; bright red and of highest sub-acid quality, making it unequalled for the table, cooking or market.

GRAPE VINES

No home should be without grapes. They are planted anywhere and everywhere, to trail on fences, sides of houses, etc. Grapes when planted in such manner grow without any care. Even people who live in crowded towns and cities can grow grapes. They are also a paying crop to grow for market.

25 cents each; \$1.50 for 10; \$12.50 for 100; \$100 for 1000.

CONCORD

HORSE-RADISH

In Great Demand for Seasoning. Easily Grown.
6 for 25 cents; 40 cents per dozen; \$2.00 per
100, postpaid. Not prepaid, \$1.50 per 100;
\$13.00 per 1000

GOOSE BERRIES

25 cents each; \$2.00 for 10; \$15 per 100

DOWNING. One of the old reliable varieties. Fruit is quite large, pale green in color and of splendid quality. Bushes are vigorous growers.

HOUGHTON. This variety rarely fails to produce a crop every year, and usually the bushes are loaded to the limit. The berries are of medium size, and the plants are extremely hardy and healthy.

ASPARAGUS

This is the earliest and finest of the spring vegetables. It is very profitable to grow, both for home use and market, as a bed once established will remain in good condition for thirty years or more. Have ground in good condition, and place plants eight inches apart in the row with rows three feet apart. Plant deep enough so that the crowns are covered with from two to three inches of mellow earth. Enrich and give dressing of 3 lbs. salt to sq. yd. each spring.

50 cents for 25; \$1.50 for 100; \$8.00 per 1000

CONOVER'S COLOSSAL. Large and rapid grower of excellent quality; green in color.

PALMETTO. Large, dark green variety of vigorous growth, having pointed tips.

CATAWBA (Red). Well known. Bunch and berry large and of a rich, vinous, refreshing flavor and best quality. Ripens several weeks after Concord.

CONCORD (Black). The most extensively planted and generally successful grape in America. Bunch and berry large, fair quality, medium early; vine a rank grower, very healthy, hardy and productive.

MOORE'S EARLY. About two weeks earlier than Concord; large, black, with a heavy bloom; desirable for home and market for its size, season, hardiness and productiveness.

NIAGARA (White). A magnificent grape and very valuable for both garden and vineyard. Berries large with tough skin; quality very good; beautiful bunches of the largest size. Ripens about with Concord. A rank grower and very productive. Popular with vineyardists and amateurs. North and South.

RHUBARB

12 cents each; \$1.00 for 10; \$2.25 for 25;
\$6.50 per 100

This very desirable vegetable comes early in the spring. The large stems of the leaves are used for pie-making and stewing. It is also desirable for medicinal purposes. A deep, rich soil is indispensable to secure large, heavy stalks. Plant in rows four feet apart, with the plants three feet distant. Set so that the crowns are about one inch below the surface. Top dress in the fall with stable manure and fork under in the spring.

LINNAEUS. This variety produces a small stem of fine quality; early; excellent for cooking.

VICTORIA. Very large and valuable for market. Early. Quality good.

BOX BARBERRY

25c each; \$2.00 per 10; \$17.50 per 100

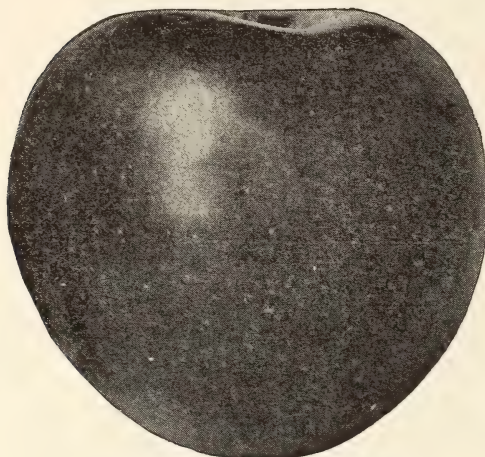

A very dwarf, compact form of Berberis Thunbergii of ironclad hardihood. Especially valuable for edging beds in formal gardening or for forming a low hedge anywhere. Its small, pretty leaves are green, changing to brilliant shades of yellow and red in autumn. For edging, plant 4 inches apart; for a low hedge, plant 6 to 9 inches apart.

A SPECIAL REQUEST

We are making a special request that every one who receives this catalogue send us an order, even if only for a small amount. We are so sure that our stock will please you that if we can only induce you to give us a trial order, we believe your future business will be with us. There is no advertisement equal to a satisfied customer. We are looking for customers and shall try hard to satisfy them.

APPLE TREES

The price of apples is always high, and it seems impossible for growers to supply the demand. It is the healthiest of all the fruits. Its seasons of ripening extends throughout the entire summer and fall months. It is also possible to have them the year around.

STAYMAN WINESAP

	Each	10	100
2 to 3 ft. trees	\$0.30	\$2.50	\$20.00
4 to 5 ft. trees50	4.50	40.00
5 to 8 ft. extra heavy75	6.00	50.00

STAYMAN'S WINESAP. Winter. In appearance and flavor this is one of the best Apples grown. Of medium size, conical and mostly covered with red and yellow markings. Flesh fine, crisp and of fine flavor. This will keep well till April of the following spring if kept in a cool place and not disturbed.

YORK IMPERIAL. Winter. Medium to large; white shaded crimson; crisp, juicy, sub-acid and of fine quality. Tree is a very thrifty, hardy grower and quite productive.

YELLOW TRANSPARENT. Early. Skin clear white, pale yellow when ripe; flesh white and very tender, juicy, sub-acid, and of fine quality. A productive, excellent and quite popular variety. Tree of dwarfish habit.

ROME BEAUTY. Winter. Large; an exceedingly beautiful Apple of pale yellow shaded with red; tender, juicy, good and profitable. Quality and flavor way above the average; always sells well. Free abundant cropper.

WINESAP. Medium to large size. Red color, flesh yellow; firm, crisp, with rich flavor; quality very good. November to May.

MAMMOTH BLACK TWIG. Winter. Dark red; a very good winter Apple, sub-acid and high flavor.

BALDWIN. Winter. Large; deep red, crisp, juicy and rich flavored.

JONATHAN. Winter. A beautiful red Apple, highly flavored, tender, juicy, spicy and rich; splendid for family use and highly profitable for market; tree long lived, productive and an early bearer.

WINTER BANANA. Size large, golden yellow and beautifully shaped with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich aromatic flavor. Season November to January.

McINTOSH. Medium size, nearly covered with a bright red, flesh yellowish, tender, juicy, sub-acid. October to February.

DELICIOUS. Autumn. Fruit large, nearly covered with brilliant dark red; flesh fine grained, crisp and melting, with delightful aroma; very highest quality; a splendid keeper and shipper; tree one of the hardiest.

DUCHESS. Summer. Good size; yellow striped with red; juicy and sub-acid; a tremendous cropper. Does not bruise—is a good shipper.

GRIMES' GOLDEN. Fall and Winter. A fine table and cooking apple; yellow, rich and tender. When fully mellowed, it is one of the best eating apples grown. Tree very productive. Apple large and of splendid flavor; a good keeper.

PEAR TREES

First-class trees, \$1.00 each; \$9.00 per 10.

KIEFFER. One of the most profitable market pears. It is an abundant and regular bearer. Good shipper. Fruit large; color yellow with red cheek. Season October.

BARTLETT. Season last of August to September 15th. Good strong grower; flesh is white, fine grained, luscious, large and buttery; has a rich, melting flavor and very sweet.

PLUM TREES

First-class trees, \$1.00 each; \$9.00 per 10.

ABUNDANCE. Fruit very large and showy; flesh light yellow; exceedingly juicy, tender and sweet. A good market variety. July.

BRADSHAW. Large size, flesh yellowish green, juicy and sweet; skin dark violet red. Ripens middle of August.

BURBANK. Fruit very large; dark violet red; flesh juicy and pleasant. Ripens middle of August. Productive.

QUINCE TREES

First-class trees, \$1.25 each; \$11.00 for 10.

CHAMPION. Tree strong grower; produces a good crop every year. Fruit is large and of good quality. Cooks as tender as an apple. October.

CHERRY TREES

Nice 1-year trees, \$1.25 each; \$11.00 for 10.

Sweet Cherries

BLACK TARTARIAN. Black, very large, rich and sweet. Productive. Ripens last of June.

GOVERNOR WOOD. Yellow with red cheek; tender, rich, delicious, very fine, large, roundish, depresses at stem. Productive; early.

Sour Cherries

EARLY RICHMOND. Medium to large. Dark red, juicy, good flavor. June.

MONTMORENCY. Medium to large. Dark red, juicy, good flavor. Late.

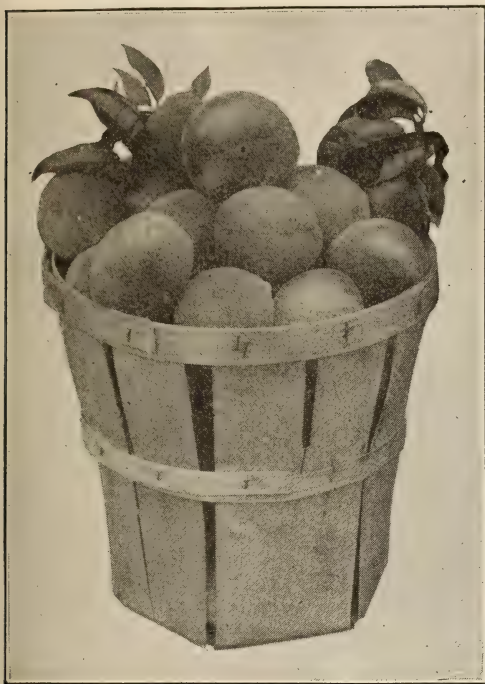

MORE FRUIT TREES SHOULD BE PLANTED

The planting of fruit in all its branches has not kept pace with the increase in population, and in consequence we are now confronted with an extreme shortage.

It is not necessary to stop growing farm crops because you are planting a new orchard; you can grow almost any kind of crops among your planted trees for at least three years, and it will be much better for your trees if they receive such extra cultivation.

PEACH TREES

While my list of peaches is not large, it is the pick of the whole list, the kinds you will not go wrong on. We all want peaches, and it only takes a few trees to supply a large family the entire peach season.

A Basket Of Elbertas

	Each	10	100
2 to 3 ft.	\$0.30	\$2.50	\$20.00
4 to 5 ft.40	3.50	30.00

ELBERTA. Mid-season. A valuable large peach, of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

BELLE OF GEORGIA. Ripens here the 1st to 15th of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

CARMEN. A very hardy peach, ripening here about the middle of July; skin pale yellow, with blush on sunny side; flesh white, tender, sweet and melting. Ships well. The best early market peach.

CHAMPION. An exceedingly good early peach. Skin creamy white with red cheeks; a perfect freestone, which is a rare thing among early peaches; very hardy; regular bearer.

WHITE HEATH CLING. Ripens from September 10th to 15th. This is an old variety of cling peach and has never been excelled by any other of its class. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for canning purposes.

NUT TREES

BUTTERNUT. A fine native tree producing a large, longish nut, which is prized for its sweet, oily, nutritious kernel.

2 to 3 feet, 50 cents each.

PECAN. The tree grows fast and bears well, producing large crops of thin-shelled nuts that are full ofkerneled and delicately flavored.

18 to 24 inch, 35 cents each.

JAPAN WALNUT. Very hardy, makes quick growth, bears abundantly when young, produces large nuts of best quality.

18 to 24 inch, 35 cents each.

WALNUT, BLACK. The common, well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.

18 to 24 inch, 3 cents each.

JAPAN BARBERRY
(Berberis Thunbergii)

Japan Barberry is another good hedge plant ranking next to California privet in popularity. You should see it in winter, with its brilliant red berries shining through the glistening ice on the branches; watch the birds eagerly seeking these berries. Note the thick, dense growth of gracefully curving branches, which make a hedge of them beautiful. In autumn, watch the leaves turn to a fiery blaze of orange and scarlet, rivaling the changing maples and the oaks.

Cluster these plants at your walk entrances or at your porch; they are most adaptable.

DASHEEN

The Coming New Vegetable

Choice seed tubers, 3 for 40 cts.; 6 for 75 cts.;
12 for \$1.25; 25 for \$2.00, prepaid.
300 to 400 Bushels per Acre. The Potato's
Only Rival.

Descriptive circular describing this wonderful vegetable sent upon request.

SHADE AND ORNAMENTAL
TREES

NORWAY MAPLE. A large, handsome tree of spreading, rounded form, with broad, deep, green foliage. Very hardy, and extensively planted.

2 to 3 feet, 50 cents each.

SILVER MAPLE. Produces a quick shade. The leaves on top are light green, underneath the leaves same shade as bright silver, and as the summer breeze approaches them, the silver and green flashes are very attractive. Extensively planted.

2 to 3 feet, 40 cents each.

AMERICAN ELM. A fine wide-spreading tree, of very dark green leaves, very extensively planted and considered by many the best shade tree in the world. Entirely hardy and succeeds in any location.

2 to 3 feet, 40 cents each.

ORIENTAL PLANE. Has a very wide round topped head, thick branches rapid grower. A good one for either street or lawn planting.

2 to 3 feet, 40 cents each.

AMERICAN ARBORVITAE. Rather dwarf habit of growing. Its foliage or leaves are flat instead of needle like, and sets on edge; color bright green. One of the most extensively planted of all evergreens. Used as specimens for the lawn, and in tubs for porches; also extensively planted for hedges and screens, to break the force of winter winds. Fast grower for first four years; after this dwarf habit of growing.

18 to 24 inches, 75 cents each.

TINGLE'S BEST FREE BLOOMING ROSES

In the Rose, Nature has made a perfect combination of beauty, grace and fragrance which pleases each of us. To grow them is not difficult, as was once thought. People are turning to rose-growing as never before. You will find it fascinating to grow your own roses, to learn their names and habits; then to cut the buds and to watch them open. Here is a selected list of the very best varieties grown—the ones that are easy to grow and that bloom abundantly. Start a rosebush this year.

2-year size, 50 cents each \$5.00 per dozen.

LA FRANCE

LA FRANCE (Tea). Delicate silvery rose, shaded with cerise pink, often silvery pink, with peach shading. An old favorite.

KAISERIN AUGUSTA VICTORIA. A beautiful Rose, with elegant, large-pointed buds and very large, full double flowers; color, delicate creamy white; deliciously fragrant.

HELEN GOULD. One of the best hardy Ever-blooming Roses; in color a very soft, intense carmine-crimson, with deeper shades in the depth of the petals, much like American Beauty. The profusion of its bloom is truly marvelous, every shoot producing a flower.

J. B. CLARK. This splendid new Rose is placed by some cataloguers among the Hybrid Teas; but it is perfectly hardy, unusually large and expresses in every way the characteristics of the Remontant type. It is robust in growth, with clean, heavy foliage. Flowers are large and superbly constructed; deep scarlet overlaid crimson.

GEN. JACQUEMINOT. Familiarly known as "the Jacq. Rose" or "Gen. Jacq." This is one of the old reliable reds, as well and favorably known as any variety of its class; free blooming, rich crimson scarlet.

JONKHEER J. L. MOCK. The color is carmine on the outside and imperial pink on the inside of the flower. The blooms are very large, perfectly formed and highly perfumed.

CRIMSON RAMBLER. The famous crimson-clustered climber. Makes shoots eight to ten feet long in a season.

DOROTHY PERKINS. A beautiful shell-pink; foliage finer, smoother and darker than Crimson Rambler. This is unquestionably the thriftiest, showiest and most practical of the older pink climbers and trails its riotous clusters over more verandas, windows and trellises than any other one variety.

WHITE DOROTHY. A beautiful white-flowered counterpart of the pink Dorothy Perkins. The vines are a sheet of white during their blooming season, and are especially valuable because of rarity of good white Climbing Roses.

BABY RAMBLER. The original dwarf form of Crimson Rambler. The wonderful persistency of its bloom makes it one of the choicest plants for summer bedding, and as an edging to borders of shrubs, roses or perennials it has no equal.

BABY RAMBLER (Pink). Beautiful bright pink. Blooms in masses, like the climbing Dorothy Perkins Rose.

BABY RAMBLER (White). Each branch bears from 15 to 50 little creamy white flowers.

CANNAS

CITY OF PORTLAND. Distinct among the several really worth-while pink Cannas. Derived from "Mrs. Alfred Conard," this new variety is a deeper, warmer pink, holding its tone through both hot and cool weather. 3½ feet. 20 cents each; \$2.00 per dozen.

FIREBIRD. A magnificent red Canna, the trusses being very large, compact, distinctive, with nicely rounded petals 2½ inches and more wide. Stalks are firm and upright, bearing their burdens well above the foliage. The color is fast; absolutely pure scarlet, with no suffusion, streaks or blotches whatsoever. Height, 3 to 4 feet. 20 cents each; \$2.00 per dozen.

HUNGARIA. 3½ feet. Green foliage. Blush pink with satiny sheen not unlike the color of a Paul Neyron rose. The plant is a free, early and continuous bloomer. It is the ideal pink bedding canna; of strong, robust habit; carries its enormous trusses high above the foliage. 20 cents each; \$2.00 per dozen.

KING HUMBERT. The grandest Canna ever offered. Large, heart-shaped leaves of purple madder brown over bronze, the dark ribs sharply defined, crowned with immense heads of orchid-like flowers. Individual petals are of the largest size; velvety orange-scarlet flecked carmine; rose tinted at margin and base. 4 to 4½ feet. 15 cents each; \$1.50 per dozen.

THE PRESIDENT. This magnificent red Canna (introduced in 1918) was fittingly named "The President." The flowers are immense, round, firm—often seven inches across—of extra good quality and borne in the greatest profusion. The color is unfading, pure, glowing scarlet; foliage rich green. 4 feet. 30 cents each; \$3.00 per dozen.

RICHARD WALLACE. A tall growing, wide flowered, heavy trussed canary yellow—the largest and best of its color; bleaches very little. 5 feet. 15 cents each; \$1.50 per dozen.

WINTZER'S COLOSSAL. Without doubt the largest flowered Canna to date, over eight inches across. Strikingly vivid scarlet that retains its brilliancy. 5 feet. 25 cents each; \$2.50 per dozen.

SPECIAL—For \$1.25 we will send one of each of the above Cannas.

LEAMON G. TINGLE

PITTSVILLE, MD.

My No.	Date Received	Date Shipt
--------	---------------	------------

NOTE—Early in the season we usually have in stock everything listed in this catalog but late in the season we frequently run short of some of the varieties, therefore, when you order late please state whether we shall substitute something equally as good and as near like the variety ordered as possible or return your money for any stock we may be out of. Answer:

TINGLE'S MAGNIFICENT DAHLIAS

Price, 15 cents each, except as noted.

ACHIEVEMENT (Collarette). The largest and finest of the Collarettes. A clear, rich, velvety maroon; collar a beautiful waxy snow-white, very faintly overlaid pinkish crimson.

BRUNHILDE (Cactus). A handsome violet-purple; wide, loose, recurved and somewhat twisted petals.

CHATENAY (Peony). The pink shades combining with the salmon makes this one of the most beautiful dahlias. Dwarf, free and fine stem.

CUBAN GIANT (Show). Flowers six to seven inches in diameter, dark glowing crimson shaded maroon. A tall, strong grower with projecting flower stems.

ELLA KRAEMER (Cactus). One of the most satisfactory pink dahlias and a good cut flower sort.

F. W. FELLOWS (Cactus). This variety produces large blooms with narrow florets, flower stems very wiry, color bright orange scarlet; very free; splendid. 50 cents each.

GOLDEN EAGLE (Cactus). Large flowers with incurved petals; golden buff.

JACK ROSE (Dec.). A magnificent sort, very free flowering and showy in the field, with long stems and perfect form for cutting. Color rich crimson-red, with maroon shadings at centre. The most widely planted dahlia today.

MINA BURGLE (Dec.). One of the finest varieties producing flowers of gigantic size and remarkable beauty. The flowers are a brilliant scarlet and borne upon long, wiry stems, well above the foliage. A variety which attracts universal attention. 25 cents each.

MRS. J. G. CASSATT (Dec.). Rose colored, with grand stems and plenty of substance in flowers.

MRS. WILLIAM MARSHALL (Cactus). Soft pink, base of florets deeper in tint, large creamy white centre.

NEWPORT WINNER (Single). Large crimson, of good form and size.

PRINCESS JULIANA (Peony Dec.). A dahlia of special merit; it is pure white, perfect flowers, dark green foliage; long, robust stems. (Cut flowers last for three or four days in water.) A robust grower, it is a variety that should be grown by every lover of the dahlia.

QUEEN VICTORIA (Show). A fine pure canary yellow dahlia. Profuse bloomer; long stem.

RED HUSSAR (Show). Tall, bushy, upright; with wrinkled highly ornamental foliage. Flowers full, recurved to ball shape, fiery cardinal. A good one.

SOUV. DE GUSTAVE DOAZAN (Dec.). Mammoth flowers with long, even petals 1 to 1½ inches wide; centre rounded up and much darker than balance; tinted orange-red. A free bloomer and very showy. 25 cents each.

SYLVIA (Dec.). Deep pink, tinting to light pink at centre; large perfectly formed flowers produced profusely on long, stiff stems. Indispensable where quantity of flowers are wanted. A strong, vigorous grower and always blooms.

TUSTU (Cactus). One of the most beautiful to date. The color is perfectly gorgeous—a beautiful velvety maroon. The petals are very long, tightly quilled and arranged in exact regularity. 50 cents each.

WHITE SWAN (Show). A beautiful pure white dahlia. A good cut flower variety and a profuse bloomer.

VIVIAN (Show). White, effectively edged rose-violet; one of the largest and finest to date.

WILLIAM AGNEW (Dec.). An old standard variety and still one of the most popular reds. Flowers large, on long, slightly drooping stems; a vivid unshaded red.

YELLOW DUKE (Dec.). Giant flowers of clear canary yellow on long stems.

Special Offer

10, my selection, all different, for \$1.00.
10, your selection, all different, for \$1.50.

HARDY ORNAMENTAL SHRUBS

Nice Large Plants, 50 cents each; \$4.50 for 10

BUDDLEIA ("Butterfly Bush," "Summer Lilac"). One of the most admired and sought-after shrubs in the trade. Of quick, bushy growth; when the lovely bloom-spikes appear in July, the shrub, which had probably died down nearly to the ground during winter, is now a perfect specimen of about five feet, radiating a delightful perfume and glowing with the tints and flower shape of the spring lilacs.

DEUTZIA CRENATA. Double white, flowering in June.

DEUTZIA PRIDE OF ROCHESTER. Flowers larger than Crenata, white, the outer petals being flushed with rose.

HYDRANGEA (Paniculata Grandiflora). Fine tall hedges, or if planted in rich soil and severely pruned every spring before the leaf buds open, will get to be very dense, dwarf clumps laden with massive white plumes. Large beds, kept at a uniform development, are extremely showy; first snowy white, then pink, then reddish bronze and green. August till autumn.

HYDRANGEA (Arborescens Grandiflora) ("Hills of Snow"). The flowers are, in a large way, similar to the familiar "Snowball" in appearance; conspicuously white and imposing. July to September.

PHILADELPHUS (Syringa or Mock Orange). The flowers are very profuse, similar to strawberry blossoms, but larger, white with a rich, creamy tinge imparted by the golden stamens.

SNOWBALL. An old-time favorite, large, round balls of little white flowers; just as popular today as ever. Grows six to nine feet tall. Blooms in May or June. Very hardy.

JAPAN SNOWBALL. Pure white flowers in dense, globular clusters, four to five inches in diameter, which look like balls of snow. The plant grows six feet and over, and the blooms fairly cover the bush. The heavy-ribbed foliage of deep, dark green is beautiful always, and in May it makes a splendid setting for the handsome balls of snow-white flowers.

SPIREA VAN HOUTTE. One of the very best of all shrubs; a complete fountain of pure white bloom in May and June. The foliage and bush shape is attractively ornamental the year round.

SPIREA ANTHONY WATERER. Dwarf habit of growing; very dense; fine for base planting and single or double bunches on the lawn. Blooms in great profusion the entire summer and fall. Rose pink flowers.

WEIGELA ROSEA. This is one of the most popular of all the Weigelas; a tall, growing, vigorous sort with deep pink flowers in the greatest abundance during June, and more sparsely at intervals throughout the summer.

CLEMATIS. Grand for pillars and trellises, pegged down for bedding and for running over rock work, old trees and stumps. They delight in rich soil and sun.

WISTARIA. One of the handsomest subjects for use on pergolas, porches and trellises, with attractive foliage and magnificent dense, drooping clusters of pea-shaped flowers, crowning the top. Can furnish both purple and white.

A field of peonies just coming into bud. We have thousands of them

HERBACEOUS PEONIES

The peony runs with the rose in gardening importance, and during its season inspires as much enthusiasm and rivalry among plant lovers as its older rival. Fall planting is more generally practiced, but the following list for early spring delivery is a selection of very good varieties which are thoroughly dependable.

Price of a dozen is ten times the price of one.

COUROUNE D'OR (Crown of Gold). (Calot, 1873). Semi-rose type; late mid-season; large, flat. Pure white with a ring of yellow stamens around a tuft of centre petals. Delicate carmine pencillings on edges of a few central petals. 50 cents each.

DUCHESSE DE NEMOURS (Calot, 1856). Large, sulphur-white, with a pronounced greenish reflex. Vigorous grower; very free bloomer. Fragrant; early. Fine for cutting, to follow Festiva Maxima. 50 cents each.

EDULIS SUPERBA (The Memorial Day Peony). Extremely early, rarely failing to be in bloom for Memorial Day. A beautiful brilliant mauve-pink with silvery reflex. Very large blooms on strong, upright stems. 50 cents each.

FESTIVA MAXIMA (Mieliez, 1851). Rose type; enormous; very full bloom, often eight inches in diameter, on strong $3\frac{1}{2}$ -ft. stems. Color, snow white with carmine spot on edge of centre petals. One of the grandest and earliest whites in existence. 50 cents each.

FLORAL TREASURE (Rosenfield, 1900). (Sym. Delicatissima). Rose type; early mid-season. Very large, full flowers of clear, even pink; shading lighter at the centre. One of the best shell pinks. 50 cents each.

KARL ROSENFELD (Rosenfield, 1908). Semi-rose type bloom. A very brilliant and striking dark crimson. Very tall, strong compact grower and free bloomer. A prize winner at the American Peony Society in June, 1911. Extra fine cut flower; lasts extra good. \$2.50 each.

GERMAN IRIS

Explanation of abbreviations and signs in following descriptions: S. signifies "standards" or upright petals; F. "falls" or drooping petals. Price of a Dozen Is Ten Times the Price of One.

CELESTE. Pure celestial blue throughout, shading to porcelain; large open flowers, held high in the air; very profuse and one of the finest varieties; tall habit. 15 cents.

CHARLES DICKENS (Orova). S. light violet; F. indigo with white at base. 15 cents.

CHARLOTTE PATTI (Brilliant). S. golden yellow; F. light yellow, veined with white at base. 15 cents.

DARIUS. S. lemon yellow; F. light yellow blotched and marbled with rosy lilac. 15 cents.

DELICATA. S. delicate straw tinted with rose; F. deep lilac shading to white. 15 cents.

L'ECLÉTANTE. Bomb type; mid-season flowers are very double and full; color deep brilliant velvety-crimson. It makes a handsome plant, every flower standing up straight and erect well above the foliage. I think this one of the finest peonies. 50 cents each.

LOUIS VAN HOUTTE. One of our best deep reds, free bloomer, late mid-season; lasts well in field or cut; first prize winner in 1920, best red. 50 cents each.

MADAME CALOT (Mieliez, 1856). Very pale pink centre, shaded darker, silver tint. Very large, rose type; very fragrant; tall, strong, upright. Early. 50 cents each.

MADAME DUCEL (Mechin, 1880). Bomb type; mid-season. A very large, wonderfully built flower. Broad guard petals; central bomb shaped like a huge ball. Very double. The closely set centre petals are incurved like a chrysanthemum. A solid color of silver lilac-pink. 75 cents each.

MADAME DE VERNEVILLE (Crousse, 1885). Very large, finely formed, anemone shaped flower. Guard petals sulphur white. Centre petals rose white with carmine touches. Flower of good substance. Stems long and strong. An ideal cut flower. Later than Festiva Maxima and equal if not superior in beauty. Pleasing fragrance. We consider this one of the best whites if not the best. 50 cents each.

MEISSONIER (Crousse, 1886). Large, full flower of brilliant purple-red, with deep crimson centre. Fragrant, free bloomer. Very brilliant coloring. Mid-season. 75 cents each.

HALEFAN. Creamy white. Large flowers of good substance. 50 cents.

H. CRAMER. S. deep celestial blue; F. pure Yale blue; tall habit; blooms early. 15 cents.

INGEBORG (Int.). Pure white. Large flowers of handsome form. 50 cents.

LA TENDRE (Bridesmaid, Edina). S. porcelain slightly smoked; F. light blue heavily veined with violet. 15 cents.

MITHRAS. S. light yellow; F. brilliant wine-red with narrow border of deep yellow. 50 cents.

NIEBELUNGEN. S. fawn-yellow; F. violet-purple on bronze. Very large. 50 cents.

PAULINE. S. bright blue; F. somewhat darker blue. 15 cents.

WALHALLA (Int.). S. lavender; F. wine-red. Large flower. Free bloomer. 50 cents.
